MARCH, 2007

PASSWORD RESET REQUESTS

Just a reminder, passwords will ONLY be reset during regular Safety Inspection office hours, which are Monday through Friday, 8:00 A.M. to 4:30 P.M.

PLEASE DO NOT CALL Utah Interactive, they cannot perform a password reset.

WEB-BASED INSPECTION PASSWORDS

Due to a high demand, we have changed the length of time your personal password will last before expiring. All passwords will now be good for 180 days (six months).

Please remember when typing in your password to make sure your 'CAPS LOCK' key is not on. This alone has caused numerous inspectors problems. Also, if you type in the incorrect password more than three (3) times the system will lock you out. The only way to correct this is to contact us for a password reset.

2007 INSPECTOR RECERTIFICATION REMINDER

EFFECTIVE JANUARY 1, 2007 Only persons certified during the previous year, last 365 days, will be allowed to re-certify utilizing the 'CD' or on-line certification process. All other's who have allowed their certification to lapse for more than one-year, 365 days, will be required to attend the full 16-hour Safety Inspection Course offered through any one of the twelve Regional Educational Institutions. See page two (2) of the Passenger Vehicle inspection manual.

UPDATE STATION INSPECTORS

STATION MANAGEMENT - Please notify our office when an inspector leaves your employment or they transfer to a different station. It is very important that we have the most accurate station and inspector information available. If you need a change of personnel form you may pick one up at our office or you may call and request one.

It is extremely important that stations using the web-based inspection program notify us immediately when an employee is terminated or leaves your employment. This allows us to protect your station by locking the inspector out of accessing inspections under the station's business.

REQUIRED EQUIPMENT ITEM

EFFECTIVE JANUARY 1, 2007 All Official Safety Inspection Stations are required to have a **TIRE PRESSURE GAUGE**. Failure to have required equipment may result in the station being suspended. If your station, by chance, does not have a tire pressure gauge, please purchase one before continuing to perform inspections.

INSPECTOR CERTIFICATION CARDS

Inspector certification cards are the property of the inspector. These cards must go with the inspector when he/she changes employment. These inspector certification cards are required to be posted at the place of employment for as long as the inspector works there. In the event of a lost or destroyed certificate, the inspector must pay a \$20.00 fee to obtain a duplicate card.

2007 SAFETY INSPECTION MANUAL

Please make sure your station is using the new 2007 Safety Inspection Manual. We have noticed that some stations are still referring to last year's manual. Please remember that changes are made every year, and in order to have the most recent information, you must have a copy of the new manual. If you need a 2007 manual, you may purchase one from our office for \$10 or you can download a copy from our website at safetyinspections.utah.gov

REPAIRED ITEMS

We have noticed that some stations are making repairs on vehicles and not marking the certificate as repaired. Please make sure that all repaired items are marked as repaired, and not as passed, when conducting vehicle inspections. This information is a valuable statistic we use to determine how much money is used to make needed repairs on rejected vehicles.

BILLING PROBLEMS BETWEEN STATIONS

Inspectors that work for more than one station, please make sure that you are accessing the correct station before starting an inspection. Failure to double check the station creates billing problems between stations. We are working on adding an extra reminder to the program, which will hopefully eliminate future problems.

WINDOW TINT WAIVERS

If you are inspecting a vehicle with a tint waiver, please make sure that the customer is meeting the requirements of the waiver. Medical waivers allow no less than 35% light transmittance, law enforcement tint waivers allow no less than 28% light transmittance. If these requirements are not being met the vehicle must be rejected. Please remember the 3% variance allowed.

WEB-BASED PROGRAM ISSUES

We have been experiencing some problems with the plate look-up feature of the web-based program. Please double check the vehicle information when you are using this feature. We are also working on other program issues that will be implemented in future updates.

AGENCY ACTIONS

<u>Station/Insp Name</u>	<u>AgencyAction</u>	<u>Disposition</u>
